

Internship Manager

Backend API — Role-Based Reference

Generated from Spring Boot Controllers • May 2026

ADMIN_IT

System administrator.
User lifecycle & oversight.

ENSEIGNANT

Teacher / supervisor.
Subjects, candidatures & mentoring.

ETUDIANT

Student applicant.
Apply, track & collaborate.

Table of Contents

1. **ADMIN_IT** — Platform Administrator
2. **ENSEIGNANT** — Teacher / (responsable)
3. **ETUDIANT** — Student

How to read this document

Each section is organised by user role. For every role you will find: (1) a short description of responsibilities, (2) a list of high-level capabilities, and (3) detailed API tables grouped by feature area. HTTP methods are colour-coded: **GET** **POST** **PUT** **PATCH** **DELETE** **WS** (WebSocket). Endpoints noted as *service-enforced* carry additional logic beyond the `@PreAuthorize` annotation.

[SYS] ADMIN_IT

The system administrator with the highest privilege level. Responsible for user lifecycle management, account provisioning.

Key Capabilities

- Register new users (students, teachers, other admins)
- View, deactivate, and reactivate any user account
- Browse all active users with pagination
- View any user profile by ID
- Add New School years (activate a new school year)

Authentication & User Management

Method	Endpoint	Description	Notes
GET	/api/candidatures/archive/{yearId}	Browse all candidatures for a past academic year	Optional status filter

[TCH] ENSEIGNANT

Teachers manage academic subjects, supervise students through the internship lifecycle, review candidatures, schedule meetings, and track task progress. A sub-role `responsablePFE` unlocks department-level management enforced inside the service layer.

Key Capabilities

- Propose, edit, and delete academic subjects
- View and filter all current-year subjects and archives
- Review candidatures: accept, refuse, or request clarification
- View supervised students' affectations
- Mark projects as complete or abort an affectation
- View workload statistics for all teachers in the department
- Create and manage meetings (rendez-vous) for internships
- Send, read, and delete chat messages on candidatures
- Create, update, and delete tasks linked to affectations
- Upload and download files for affectations

Authentication & Profile

Method	Endpoint	Description	Notes
POST	<code>/api/auth/login</code>	Authenticate and receive a JWT token	Body: <code>LoginRequest</code>
GET	<code>/api/users/me</code>	View own profile	—
PUT	<code>/api/users/{id}</code>	Update own profile information	Service enforces ownership
GET	<code>/api/users/{id}</code>	View a student or colleague profile	ENSEIGNANT or ADMIN_IT

Subject Management

Method	Endpoint	Description	Notes
POST	<code>/api/subjects/teacher-proposal</code>	Propose a new subject for the current year	Body: <code>SujetRequest</code>
GET	<code>/api/subjects/my-subjects</code>	View all own subjects across all years	Paginated
GET	<code>/api/subjects</code>	Browse all subjects for the current year	Optional status filter
GET	<code>/api/subjects/{id}</code>	View details of a specific subject	—
GET	<code>/api/subjects/archive/{yearId}</code>	View subject archives for a past year	—

Method	Endpoint	Description	Notes
PATCH	<code>/api/subjects/{id}/status</code>	Change a subject's status	<i>Body: StatusRequest</i>
PUT	<code>/api/subjects/{id}</code>	Update subject content or metadata	<i>Body: SujetRequest</i>
DELETE	<code>/api/subjects/{id}</code>	Delete a subject	—

Candidature Review

Method	Endpoint	Description	Notes
GET	<code>/api/candidatures/me</code>	View candidatures for own subjects (current year)	<i>Optional status filter</i>
GET	<code>/api/candidatures/archive/{yearId}</code>	View candidature archives for past years	—
PATCH	<code>/api/candidatures/{id}/accepter</code>	Accept candidature — triggers affectation creation	—
PATCH	<code>/api/candidatures/{id}/refuser</code>	Decline a student candidature	—
PATCH	<code>/api/candidatures/{id}/clarifier</code>	Request clarification from the applicant	<i>Body: MessageRequest</i>

Affectation & Internship Supervision

Method	Endpoint	Description	Notes
GET	<code>/api/affectations</code>	Supervised students' current-year affectations	<i>Role-aware</i>
GET	<code>/api/affectations/my-internship</code>	Detailed current internship info for students	<i>Paginated</i>
GET	<code>/api/affectations/workload</code>	Project view: co-workers, teacher, subject	<i>Paginated</i>
GET	<code>/api/affectations/unassigned</code>	Students with no assignment for current year	<i>responsiblePFE in service</i>
GET	<code>/api/affectations/workload-stats</code>	Teacher workload statistics for the department	<i>responsiblePFE in service</i>
GET	<code>/api/affectations/stats/count</code>	Total assignment count for the current year	<i>responsiblePFE scoped</i>
GET	<code>/api/affectations/archive/{yearId}</code>	View affectation archives for a past year	—
PATCH	<code>/api/affectations/{id}/complete</code>	Mark an internship project as completed	—
DELETE	<code>/api/affectations/{id}/abort</code>	Cancel / abort an active affectation	—

Meetings (Rendez-Vous)

Method	Endpoint	Description	Notes
POST	/api/meetings	Schedule a new meeting for an affectation	Body: <i>RendezVousRequest</i>
GET	/api/meetings/affectation/{id}	List all meetings for a specific affectation	Paginated
PATCH	/api/meetings/{id}/status	Update meeting status (CONFIRMED, CANCELLED...)	Param: <i>status</i>
DELETE	/api/meetings/{id}	Delete a meeting	—

Messaging

Method	Endpoint	Description	Notes
POST	/api/messages/{candidatureId}	Send a REST message on a candidature thread	Body: <i>MessageRequest</i>
GET	/api/messages/{candidatureId}/all	Retrieve paginated chat history	page, size params
GET	/api/messages/candidature/{id}	Alternative conversation history endpoint	page, size params
DELETE	/api/messages/{messageId}	Delete a message	Service: <i>sender-only</i>
WS	/app/chat/{candidatureId}	Real-time chat via WebSocket STOMP	Auth from <i>JWT Principal</i>

Tasks & File Management

Method	Endpoint	Description	Notes
POST	/api/tasks	Create a task linked to an affectation	Body: <i>TaskRequest</i>
GET	/api/tasks/affectation/{affectationId}	List tasks for an affectation	Paginated, sorted by <i>createdAt</i>
DELETE	/api/tasks/{taskId}	Remove a task	—
GET	/api/tasks/affectation/{id}/progr	Get internship completion percentage	Returns <i>Double</i>
POST	/api/files/upload	Upload a document for an affectation	<i>multipart/form-data</i>
GET	/api/files/affectation/{affectati	List all files for an affectation	Paginated
GET	/api/files/download/{fileId}	Download a specific file	Raw binary stream
DELETE	/api/files/{fileId}	Remove a file from the system	—

[STU] ETUDIANT

Students can browse available internship subjects, submit and manage their candidatures (including group applications), and once assigned, track their internship through tasks, meetings, messaging, and file uploads. Data access is always scoped to the student's own records.

Key Capabilities

- Browse available subjects for the current academic year
- Apply (postuler) to a subject — individually or with partner students
- Cancel a pending candidature
- View own candidatures and their current statuses
- Track own internship affectation and project details
- Chat with supervising teacher via REST and WebSocket
- View tasks created for own affectation
- Upload and download files related to own internship
- View scheduled meetings for own affectation
- Propose a custom subject to a specific teacher

Authentication & Profile

Method	Endpoint	Description	Notes
POST	/api/auth/login	Log in and obtain a JWT token	Body: LoginRequest
GET	/api/users/me	View own student profile	—
PUT	/api/users/{id}	Update own profile information	Service enforces self-only

Subjects

Method	Endpoint	Description	Notes
GET	/api/subjects	Browse all subjects for the current year	Optional status filter
GET	/api/subjects/{id}	View details of a specific subject	—
GET	/api/users/teachers	list of teachers, used in the student proposal	—
GET	/api/users/students	list of students , used in the student proposal	—
POST	/api/subjects/student-proposal/{teacherId}	Propose a custom subject to a teacher	Body: SujetRequest

Candidatures

Method	Endpoint	Description	Notes
GET	/api/candidatures/me	View own candidatures for the current year	Optional status filter
POST	/api/candidatures/postuler/{sujetId}	Apply to a subject (solo or with partners)	Body: List<Long> partnerIds
DELETE	/api/candidatures/{id}	Cancel a pending candidature	—

Affectation & Internship Tracking

Method	Endpoint	Description	Notes
GET	/api/affectations	View own current-year affectation	Role-aware — scoped to self
GET	/api/affectations/my-internship	View detailed current internship information	Paginated
GET	/api/affectations/workload	Project workload: co-students, teacher, subject	Paginated

Tasks

Method	Endpoint	Description	Notes
GET	/api/tasks/affectation/{affectati	View tasks for own affectation	Paginated
GET	/api/tasks/affectation/{affectationId}/progress	Get internship completion percentage	Returns Double
PATCH	/api/tasks/{taskId}/status	Mark a task as completed or pending	Param: completed

Messaging

Method	Endpoint	Description	Notes
POST	/api/messages/{candidatureId}	Send a message in a candidature thread	Body: MessageRequest
GET	/api/messages/{candidatureId}/all	Load chat history for a candidature	Paginated
GET	/api/messages/candidature/{id}	Alternative history endpoint	Paginated
DELETE	/api/messages/{messageId}	Delete own message	Service: sender-only
f WS	/app/chat/{candidatureId}	Real-time chat via WebSocket STOMP	Auth from JWT Principal

Meetings & Files

Method	Endpoint	Description	Notes
GET	/api/meetings/affectation/{id}	View all meetings for own affectation	Paginated
POST	/api/files/upload	Upload a document for own affectation	multipart/form-data
GET	/api/files/affectation/{affectati	List all files for own affectation	Paginated
GET	/api/files/download/{fileId}	Download a file	Binary stream
DELETE	/api/files/{fileId}	Delete own uploaded file	—
